#### **Education**

Thakur College of Engineering and Technology

BE in Computer Science | 2020-Present | CGPA: 9.63

**TP Bhatia College of Science** 

HSC | 2018-2020 | 83.64%

ICSE | 2005-2018 | 91.6%

# **Experience**

**RBK School** 

#### 1. Resume Builder

- Created a website that allows creating a resume with ease by just filling the details form and downloading it
- The website is built using React.Js ensuring that the app is highly responsive and dynamic and is designed using TailwindCSS that provides a robust set of styling options.

## 2. To-Do List

- The application allows users to create, edit, and delete tasks, as well as mark them as complete.
- Used Webpack to bundle and optimize the application's assets, and NPM to manage the project dependencies. Implemented local storage to persist the to-do list items even after the page is refreshed. Utilized JavaScript to manipulate the DOM and handle user interactions.

#### 3. Weather-App

- Built a weather website that provides services for you to stay up-to-date on the latest weather conditions in your area!
- Built using NPM and Webpack, we've optimized the site for fast loading times and a smooth user experience.

## 4. Etch-a-Sketch

The Etch-a-Sketch website is a fun and interactive online version of the classic toy that lets users
draw and erase pictures with a simple knob control. The website is built using HTML, CSS, and
JavaScript, and features a design that works well on desktop

### **Skills**

Technologies: HTML, CSS, Javascript, Java, ReactJS

Framework: NextJs, TailwindCSS

**Developers Tools:** Git, VS Code, Chrome Devtools

#### Interests

- Participating in online coding challenges, hackathons, and open-source projects.
- 4th place winner in Hackover 3.0 hackathon: Participated in the annual Hackover hackathon in October 2022, focused on developing innovative videogame.
- Building personal projects to showcase their skills and creativity.
